The Gene Ontology Handbook Jul 02 2020
This book provides a practical and self-contained overview of the Gene Ontology (GO), the leading project to organize biological knowledge on genes and their products across genomic resources. Written for biologists and bioinformaticians, it covers the state-of-the-art

of how GO annotations are made, how they are evaluated, and what sort of analyses can and cannot be done with the GO. In the spirit of the Methods in Molecular Biology book series, there is an emphasis throughout the chapters on providing practical guidance and troubleshooting advice. Authoritative and accessible, The Gene Ontology Handbook serves non-experts as well as seasoned GO users as a thorough guide to this powerful knowledge system. The Hurricane II Manual Aug 23 2019 The Hawker Hurricane was the mainstay of the RAF during the early years of World War II. It saw extensive service in the Battle of Britain, over the Mediterranean and even saw action on the Eastern Front. Reliable, sturdy, rugged and

effective this fighter proved itself time and again in action against the Luftwaffe. With a 1,260 horsepower Merlin engine the Hurricane was, for its time, one of the best fighters ever produced. This detailed, technical manual reveals the technology behind the Hurricane's fighting ability. It examines the aircraft's engine, armament, controls, design and technical specifications to give a clear picture of the plane's strengths and limitations. Technical drawings, electrical plans and cockpit photographs support the text. The Hurricane II Manual is a facsimile of the original official workshop manual - used by the personnel who flew and maintained the aircraft - first published in the 1940s.
