Studies on the educational quality of schools Dec 12 2020 The priority program 'The educational quality of schools' has been established seven years ago by the German Research Foundation (DFG). The projects in this program investigated conditions inside and outside of school and their impact on the development of mathematical, scientific, and cross-curricular competencies. In this book major findings of the program are

presented. The projects not only give an overview of their research questioning methods and findings, but also of approaches and materials that have been developed to support learning and teaching in mathematics and science class rooms. The studies reported here identify factors for weaknesses in the educational outcomes that became apparent in the international comparisons like TIMSS and PISA. The projects, however, provide empirically substantiated units on approaches that can help to improve the educational quality of schools. [Publisher, ed].

Leaders will find detailed directions for implementing the retreat; lesson plans, prayers, and handouts; material to help use the student component, Answering God's Call to Covenant, after the retreat; and suggested models for liturgical celebrations to bring the retreat to a close. It also includes suggestions on how to celebrate the retreat with the entire school through graduation and other activities. Out of the Comfort Zone Feb 23 2022 Success in careers outside the university setting depends on an individual's capacity to master professional skills and respond appropriately to dynamic situations with flexibility, adaptation, and innovative thinking. This book describes a

simple, common sense method of how to include professional skills training in any curricula without compromising academic rigor. It relies on introduction of unanticipated yet manageable crises simulating scenarios commonly experienced in the workplace. The method promises to inspire both students and their teachers to conquer new territory outside their comfort zones. Examples include how to respond to a demand for innovation and teamwork, a lay-off, a re-organization, or switching jobs and projects. These situations are bound to occur for most people and in most jobs they often create stress and, perhaps, despair. Preparing and practicing a mindful and healthy response is beneficial, and now this process can be performed in the classroom, while it serves as a platform for character building prior to unexpected real-life events. Key Features: - Description of the importance of, incentives for, and rewards of exiting the comfort zone - Principles for teaching and learning professional skills - Student anecdotes and reflection - Rubric entries and assessment of learning Table of Contents: The Comfort Zone and “Being out of It” / Exiting the Comfort Zone: Reasons and Impact / Getting Educators and Students out of the Comfort Zone / Principles of “Out-of-the-Comfort-Zone” (OOC) Teaching / Anecdotes of OOC Learning / Measuring the Outcome
