New Accountability in Financial Services Dec 15 2021 This book is a critical examination of recently introduced individual accountability regimes that apply to the financial services industry in the UK (SMCR) and Australia (BEAR and the forthcoming FAR), together with a forthcoming new individual accountability regime (in particular, SEAR) in Ireland. It provides a framework for analysing whether these regimes will achieve behavioural change in the financial services industry. This book argues that, whilst sanctioning individuals to deter future misconduct is an important part of any successful regulatory strategy, the focus should be on ensuring that individuals in the financial services industry internalise the norms of behaviour expected under the new regimes. In this regard, the analysis in this book is informed by criminological theory, regulatory theory and behavioural science. The work also argues for a trajectory towards professionalisation of financial services, and banking in particular, as an important means of positively influencing industry-wide norms of behaviour, which have a key influence on firms and individuals behaviours. Joe McGrath is

Irish Research Council Scholar, a Fulbright Scholar, an Assistant Professor at the Sutherland School of Law, and the Vice Principal for Equality, Diversity and Inclusion of the College of Social Sciences and Law, University College Dublin, Ireland. He has published in the leading international, peer-reviewed journals in his fields. Ciaran Walker is Consultant in the Financial Services Regulation & Governance group at the Dublin office of the global law firm Eversheds Sutherland, Ireland. Blockchain, Fintech, and Islamic Finance Jul 30 2020 Following the success of the first edition that brought attention to the digital revolution in Islamic financial services, comes this revised and updated second edition of Blockchain, Fintech and Islamic Finance. The authors reiterate the potential of digital disruption to shrink the role and relevance of today's banks, while simultaneously creating better, faster, cheaper services that will be an essential part of everyday life. Digital transformation will also offer the ability to create new ways to better comply to Islamic values in order to rebuild trust and confidence in the current financial system. In this new edition, they explore current concepts of decentralized finance (DeFi), distributed intelligence, stablecoins, and the integration of AI, blockchain, data analytics and IoT devices for a holistic solution to ensure technology adoption in a prudent and sustainable manner. The book discusses crucial innovation, structural and institutional developments for financial technologies including two fast-growing trends that merge and complement each other: tokenization, where all illiquid assets in the world, from private equity to real estate and luxury goods, become liquid and can be traded more efficiently, and second, the rise of a new tokenized economy where inevitably new rules and ways to enforce them will develop to fully unleash their capabilities. These complementary and oft-correlated trends will complete the decentralization of finance and will influence the way future financial services will be implemented. This book provides insights into the shift in processes, as well as the challenges that need to be overcome for practical applications for AI and blockchain and how to approach such innovations. It also covers new technological risks that are the consequence of utilizing frontier technologies such as AI, blockchain and IoT. Industry leaders, Islamic finance professionals, along with students and academics in the fields of Islamic finance and economics will benefit immensely from this book.

New Strategies for Financial Services Firms Nov 14 2021 The theme of this book "New strategies for financial services providers" is an equally relevant and important topic in science and practice. In the (post) information age economy, the German financial services market and many big financial services providers are in a deep crisis. Increasing competition due to deregulation and improved transparency through new means of communication on the one hand, and

empowered customers demanding individualized solutions for their financial problems e. g. because of new working circumstances, increase the pressure on the market participants to alter their strategies according to these new challenges. Many firms have reacted defensively either by merging in the hopes of realizing scale effects - a high-risk venture considering the last few years - or by adapting "me-too-strategies" (also known as "lemming-banking") that do not provide for a sustainable competitive advantage. Based on a profound analysis of developing mega-trends in the years ahead, especially in information and IT-intense market, Dr. Kundisch develops a new anti cyclical strategy that aims at using IT as an enabler to strengthen customer relationships and focus on individualized solutions wherever it seems economically sound to do so. However, he does not stop after the development of the strategy, but provides two important concepts that may help turn this vision and strategy into reality. Thus, he favorably and refreshingly differentiates against many contributions that stop at the fairly abstract strategic level.

The Truth about Money Sep 12 2021 Explaining difficult concepts in plain English with a breezy style, this third edition has new material covering new tax laws, retirement savings strategies, a chapter on identity theft, and question-and-answer sidebars.

Discrimination in Financial Services Mar 06 2021 Equal treatment in access to credit has long been a fundamental social goal in the United States. However, despite the passage of several laws in the U.S. prohibiting discrimination in the provision of financial services on the basis of race, gender, and marital status, among other factors, questions concerning the existence of racial discrimination in such areas as home mortgage loans and small business credit continue, and confound public policy makers. This book is composed of nine articles and a panel discussion, originally published as a special issue of the Journal of Financial Services Research. These contributions explore the complex issue of discrimination in financial services.

International Finance and Financial Services Aug 11 2021 International finance is the branch of economics that studies the dynamics of exchange rates, foreign investment, and how these affect international trade. Financial services is a term used to refer to the services provided by the finance industry. Financial services is also the term used to describe organisations that deal with the management of money and includes merchant banks, credit card companies, consumer finance companies, government sponsored enterprises, and stock brokerages. Financial services is the largest industry (or industry category) in the world, in terms of earnings. This book presents important analyses in these interaction fields.

Financial Planning Basics for Doctors Oct 21 2019 Financial Planning Basics for Doctors is a comprehensive guide on building a long-term financial plan for doctors and their families. Subjects covered include student loans, home buying, disability insurance, estate planning, college planning, retirement planning, investments, and behavioral finance, among many others. Each chapter starts with the basics before addressing more advanced concepts, frequently with examples and graphs, and concludes with a concise summary of the key takeaways. Throughout the book, there are links to free downloadable spreadsheets and a planning checklist to help you jump-start and organize your financial plan. The content provided is a result of the feedback the authors have received over thousands of meetings with doctors, condensed into a thorough overview of the most relevant ideas. Teaching hospitals do an excellent job of training our next generation of doctors, yet most new physicians graduate without having had a class on managing their finances. This book was written to fill that knowledge gap. Marshall Weintraub, Michael Merrill, and Cole Kimball are financial advisors with Finity Group, LLC, a financial planning firm specializing in working with doctors.

Management Of Banking And Financial Services, 2/E Oct 01 2020 The dynamic banking and financial services environment in the country calls for prudent decision making under pressure. Management of Banking and Financial Services provides students and practitioners with a thorough understanding of

managerial issues in the banking and financial services industry, enabling them to evaluate the overall organisational impact of their decisions. The first section of the book focuses on the basic concepts of banking and financial services, and the other sections explain how these concepts are applied in the global banking environment as well as in India. In addition to presenting the big picture of the banking and financial services industry, the book also provides useful tips on the trade-off between risk and return.

The Technological Revolution in Financial Services Feb 05 2021 Industry specialists and thought leaders explain how financial services will evolve in the coming decade in response to heightened regulation, technological disruption, and changing demographics.
